

Main Workflow (TrustLink Fraud Detection)

User (Student/Faculty)

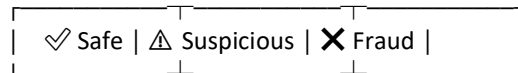

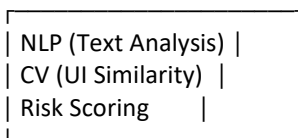

TrustLink Platform

Data Collection
(URL, WHOIS, Metadata)

AI/ML Engine

System Architecture

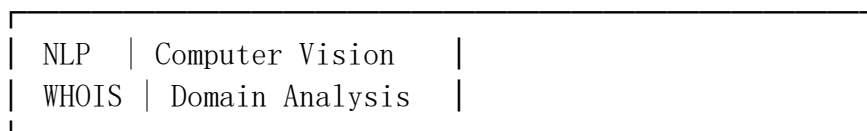

Frontend (App/Web UI)

Backend (Flask/Django API)

AI/ML Detection Engine

Database (Safe/Flagged Links)

Use Case Flow (Student Checking Link)

Student → Sees suspicious group link

Puts link in TrustLink

AI/ML Engine analyzes

Result: ⚠ Suspicious Internship Link
